

BarathX

India's public square — one-pager

Built by Indians · for Indians · owned by Indians

■ What it is

BarathX is a place to drop a take, pick a side, and get real replies — Square · Arenas · Live. Human takes only. No AI slop.

Hot takes die in WhatsApp. Reels reward the scroll, not the opinion. We're building the square those conversations deserve.

■ What we're trying to achieve

Make honest public debate normal for young India — on a platform that belongs here. Soft launch is live. We're growing through creators whose audiences already talk, argue, and care.

■ Why this collab

Your audience already debates in comments and DMs. We'd rather partner with pages people trust than buy empty reach. Creative stays with you. We share a short brief + exclusive link if we move forward.

■ Next step

Reply with how partnerships usually work on your side (format, timeline, who decides). Spelling on creatives: BarathX.
